Bath MI 48808

If passed, this bill would allow impenetrable tinted windows by removing them as a violation. It is essential to be able to see the driver of a nearby car. It is dangerous for a driver, bicyclist, pedestrian, and police officer to be unable to see what the driver is doing.

Lately, I have seen many autos with heavily tinted front windows. I thought these had been forbidden for many years. Apparently, I was mistaken.

I ask the committee to keep the prohibition in the law. Also, I think the police should enforce this law more aggressively.
